2021 - Engineering Mechanics

Department(s): Civil Engineering | Mechanical Engineering. Semester: Semester 2. Subject type: Theory.

2021

Course Code

Engineering Mechanics

2

Semester

Semester 2

Theory

Study Mode

Engineering / Science Theory

How to Study

- Read the overview and make a one-page summary.
- Open each module separately and practise the expected questions.
- Keep diagrams, tables, formulas or procedures neat according to subject type.
- Use the Master Answer Key only after attempting the questions.

Study Support

Use Malayalam for classroom discussion if needed, but keep technical terms in English.
Attempt module questions first, then check the Master Answer Key.

Mini Formula Bank for Engineering Mechanics

Quick reference cards for this subject type.

Key Definitions

Core definitions and laws used in Engineering Mechanics.

Formula / Procedure Cards

Write formula, symbols, units, substitution and final answer clearly.

Units and Symbols

Use SI units and standard symbols in every numerical or drawing answer.

Solved Problem Format

Given, formula, substitution, calculation and final answer.

Applications

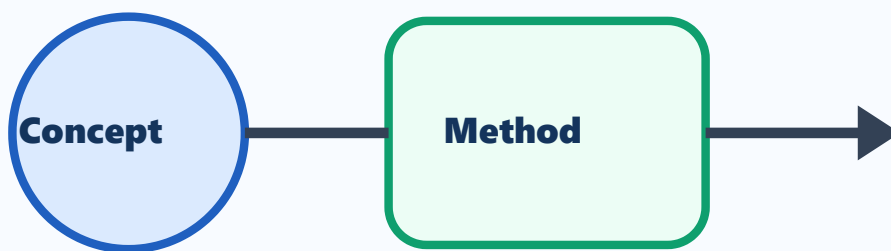

Practical engineering applications of Engineering Mechanics in the department.

Core Concepts and Key Terms

Study the definitions, symbols, basic laws and purpose of Engineering Mechanics.

Learning Outcomes

- Explain the key ideas in this module.
- Use correct technical terms in answers.
- Prepare neat diagrams/tables/procedures where required.
- Connect the topic with Civil Engineering | Mechanical Engineering applications.

Engineering Mechanics

Visual study block for Engineering Mechanics

Simple Explanation

Study the definitions, symbols, basic laws and purpose of Engineering Mechanics. Study the definitions first, then practise diagrams, procedures, tables or numericals according to the subject type.

Study Support

Use Malayalam for classroom discussion if needed, but keep the important technical terms, formulas, symbols, diagrams and final answers in clear English.

Expected Questions

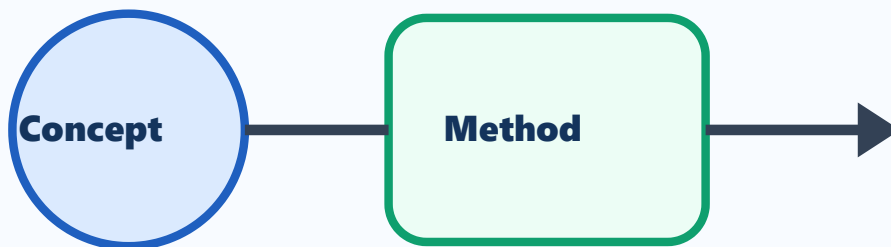

- 1 Define Engineering Mechanics.
- 2 List the important terms used in Engineering Mechanics.
- 3 Explain the need of Engineering Mechanics in Civil Engineering, Mechanical Engineering.
- 4 Write common short-answer points from fundamentals.

Principles and Methods

Study working principles, standard methods and problem-solving steps used in Engineering Mechanics.

Learning Outcomes

- Explain the key ideas in this module.
- Use correct technical terms in answers.
- Prepare neat diagrams/tables/procedures where required.
- Connect the topic with Civil Engineering | Mechanical Engineering applications.

Engineering Mechanics

Visual study block for Engineering Mechanics

Simple Explanation

Study working principles, standard methods and problem-solving steps used in Engineering Mechanics. Study the definitions first, then practise diagrams, procedures, tables or numericals according to the subject type.

Study Support

Use Malayalam for classroom discussion if needed, but keep the important technical terms, formulas, symbols, diagrams and final answers in clear English.

Expected Questions

- 1 Explain the main principle of Engineering Mechanics.
- 2 Write the standard numerical/problem-solving format.
- 3 Compare two important methods or types in Engineering Mechanics.
- 4 List important applications.

Applications and Practice

Connect Engineering Mechanics with practical engineering applications, diagrams and tables.

Learning Outcomes

- Explain the key ideas in this module.
- Use correct technical terms in answers.
- Prepare neat diagrams/tables/procedures where required.
- Connect the topic with Civil Engineering | Mechanical Engineering applications.

Visual study block for Engineering Mechanics

Simple Explanation

Connect Engineering Mechanics with practical engineering applications, diagrams and tables. Study the definitions first, then practise diagrams, procedures, tables or numericals according to the subject type.

Study Support

Use Malayalam for classroom discussion if needed, but keep the important technical terms, formulas, symbols, diagrams and final answers in clear English.

Expected Questions

- 1 Draw or describe one important application of Engineering Mechanics.
- 2 Prepare a comparison table for important types/components.
- 3 List advantages and limitations.
- 4 Write common exam mistakes.

Exam Revision

Revise expected theory questions, numericals/procedures and answer-writing pattern.

Learning Outcomes

- Explain the key ideas in this module.
- Use correct technical terms in answers.
- Prepare neat diagrams/tables/procedures where required.
- Connect the topic with Civil Engineering | Mechanical Engineering applications.

Engineering Mechanics

Visual study block for Engineering Mechanics

Simple Explanation

Revise expected theory questions, numericals/procedures and answer-writing pattern. Study the definitions first, then practise diagrams, procedures, tables or numericals according to the subject type.

Study Support

Use Malayalam for classroom discussion if needed, but keep the important technical terms, formulas, symbols, diagrams and final answers in clear English.

Expected Questions

- 1 Write the steps for a 5-mark answer.
- 2 List important diagrams/tables/procedures.
- 3 Prepare one long-answer outline.
- 4 Write last-minute revision checklist.

One-page Quick Revision

Last-minute checklist for Engineering Mechanics.

Important Points

- Definitions and key terms.
- Diagrams, formulas, procedures or formats.
- Applications in Civil Engineering | Mechanical Engineering.

Exam Method

- OK** Read question carefully.
- OK** Write answer in steps.
- OK** Label diagrams and units.
- OK** Finish with result/application.

Common Mistakes

- NO** Skipping units or labels.
- NO** Writing answer without structure.
- NO** Mixing definitions and applications.
- NO** Leaving diagrams untidy.

Answers and Hints

Answer hints exactly match the expected questions inside modules.

Module 1 Answer Hints

M1-Q1

Use definition/formula/procedure format. For numerical questions write Given, Formula, Substitution, Calculation and Final answer with unit. Relate to Engineering Mechanics.

M1-Q2

Use definition/formula/procedure format. For numerical questions write Given, Formula, Substitution, Calculation and Final answer with unit. Relate to Engineering Mechanics.

M1-Q3

Use definition/formula/procedure format. For numerical questions write Given, Formula, Substitution, Calculation and Final answer with unit. Relate to Engineering Mechanics.

M1-Q4

Use definition/formula/procedure format. For numerical questions write Given, Formula, Substitution, Calculation and Final answer with unit. Relate to Engineering Mechanics.

Module 2 Answer Hints

M2-Q1

Use definition/formula/procedure format. For numerical questions write Given, Formula, Substitution, Calculation and Final answer with unit. Relate to Engineering Mechanics.

M2-Q2

Use definition/formula/procedure format. For numerical questions write Given, Formula, Substitution, Calculation and Final answer with unit. Relate to Engineering Mechanics.

M2-Q3

Use definition/formula/procedure format. For numerical questions write Given, Formula, Substitution, Calculation and Final answer with unit. Relate to Engineering Mechanics.

M2-Q4

Use definition/formula/procedure format. For numerical questions write Given, Formula, Substitution, Calculation and Final answer with unit. Relate to Engineering Mechanics.

Module 3 Answer Hints

M3-Q1

Use definition/formula/procedure format. For numerical questions write Given, Formula, Substitution, Calculation and Final answer with unit. Relate to Engineering Mechanics.

M3-Q2

Use definition/formula/procedure format. For numerical questions write Given, Formula, Substitution, Calculation and Final answer with unit. Relate to Engineering Mechanics.

M3-Q3

Use definition/formula/procedure format. For numerical questions write Given, Formula, Substitution, Calculation and Final answer with unit. Relate to Engineering Mechanics.

M3-Q4

Use definition/formula/procedure format. For numerical questions write Given, Formula, Substitution, Calculation and Final answer with unit. Relate to Engineering Mechanics.

Module 4 Answer Hints

M4-Q1

Use definition/formula/procedure format. For numerical questions write Given, Formula, Substitution, Calculation and Final answer with unit. Relate to Engineering Mechanics.

M4-Q2

Use definition/formula/procedure format. For numerical questions write Given, Formula, Substitution, Calculation and Final answer with unit. Relate to Engineering Mechanics.

M4-Q3

Use definition/formula/procedure format. For numerical questions write Given, Formula, Substitution, Calculation and Final answer with unit. Relate to Engineering Mechanics.

M4-Q4

Use definition/formula/procedure format. For numerical questions write Given, Formula, Substitution, Calculation and Final answer with unit. Relate to Engineering Mechanics.
