

# Computer Aided Design and Manufacturing

Subject Code 6022A lesson HTML for Mechanical Engineering. This page is a student-friendly study guide with type-specific sections, expected questions and a separate Master Answer Key.

# 6022A - Computer Aided Design and Manufacturing

Department(s): Mechanical Engineering. Semester: Semester 6. Subject type: Theory.

## 6022A

**Course Code**

Computer Aided Design and Manufacturing

## 6

**Semester**

Semester 6

## Theory

**Study Mode**

Engineering / Science Theory

### How to Study

- Read the overview and make a one-page summary.
- Open each module separately and practise the expected questions.
- Keep diagrams, tables, formulas or procedures neat according to subject type.
- Use the Master Answer Key only after attempting the questions.

## Study Support

Use Malayalam for classroom discussion if needed, but keep technical terms in English.  
Attempt module questions first, then check the Master Answer Key.

# Mini Formula Bank for Computer Aided Design and Manufacturing

Quick reference cards for this subject type.

## Concepts

Basic concepts, components, functions and terminology of Computer Aided Design and Manufacturing.

## Working Principles

Principles, construction, operation, characteristics and performance points.

## Diagrams / Blocks

Use neat labelled circuit, block, flow or system diagrams where required.

## Tables

Compare types, advantages, disadvantages, ratings, faults and applications.

## Applications

Common industrial and field applications of Computer Aided Design and Manufacturing.

# Core Concepts and Key Terms

Study the definitions, symbols, basic laws and purpose of Computer Aided Design and Manufacturing.

## Learning Outcomes

- Explain the key ideas in this module.
- Use correct technical terms in answers.
- Prepare neat diagrams/tables/procedures where required.
- Connect the topic with Mechanical Engineering applications.

Computer Aided Design and Manufacturing

Visual study block for Computer Aided Design and Manufacturing

## Simple Explanation

Study the definitions, symbols, basic laws and purpose of Computer Aided Design and Manufacturing. Study the definitions first, then practise diagrams, procedures, tables or numericals according to the subject type.

## Study Support

Use Malayalam for classroom discussion if needed, but keep the important technical terms, formulas, symbols, diagrams and final answers in clear English.

## Expected Questions

- 1 Define Computer Aided Design and Manufacturing.
- 2 List the important terms used in Computer Aided Design and Manufacturing.
- 3 Explain the need of Computer Aided Design and Manufacturing in Mechanical Engineering.
- 4 Write common short-answer points from fundamentals.

# Principles and Methods

Study working principles, standard methods and problem-solving steps used in Computer Aided Design and Manufacturing.

## Learning Outcomes

- Explain the key ideas in this module.
- Use correct technical terms in answers.
- Prepare neat diagrams/tables/procedures where required.
- Connect the topic with Mechanical Engineering applications.

Computer Aided Design and Manufacturing

Visual study block for Computer Aided Design and Manufacturing

## Simple Explanation

Study working principles, standard methods and problem-solving steps used in Computer Aided Design and Manufacturing. Study the definitions first, then practise diagrams, procedures, tables or numericals according to the subject type.

## Study Support

Use Malayalam for classroom discussion if needed, but keep the important technical terms, formulas, symbols, diagrams and final answers in clear English.

## Expected Questions

- 1 Explain the main principle of Computer Aided Design and Manufacturing.
- 2 Draw a neat block/circuit/system diagram where applicable.
- 3 Compare two important methods or types in Computer Aided Design and Manufacturing.
- 4 List important applications.

# Applications and Practice

Connect Computer Aided Design and Manufacturing with practical engineering applications, diagrams and tables.

## Learning Outcomes

- Explain the key ideas in this module.
- Use correct technical terms in answers.
- Prepare neat diagrams/tables/procedures where required.
- Connect the topic with Mechanical Engineering applications.

Computer Aided Design and Manufacturing

Visual study block for Computer Aided Design and Manufacturing

## Simple Explanation

Connect Computer Aided Design and Manufacturing with practical engineering applications, diagrams and tables. Study the definitions first, then practise diagrams, procedures, tables or numericals according to the subject type.

## Study Support

Use Malayalam for classroom discussion if needed, but keep the important technical terms, formulas, symbols, diagrams and final answers in clear English.

## Expected Questions

- 1 Draw or describe one important application of Computer Aided Design and Manufacturing.
- 2 Prepare a comparison table for important types/components.
- 3 List advantages and limitations.
- 4 Write common exam mistakes.

## Exam Revision

Revise expected theory questions, numericals/procedures and answer-writing pattern.

### Learning Outcomes

- Explain the key ideas in this module.
- Use correct technical terms in answers.
- Prepare neat diagrams/tables/procedures where required.
- Connect the topic with Mechanical Engineering applications.

Computer Aided Design and Manufacturing

Visual study block for Computer Aided Design and Manufacturing

### Simple Explanation

Revise expected theory questions, numericals/procedures and answer-writing pattern. Study the definitions first, then practise diagrams, procedures, tables or numericals according to the subject type.

## Study Support

Use Malayalam for classroom discussion if needed, but keep the important technical terms, formulas, symbols, diagrams and final answers in clear English.

## Expected Questions

- 1 Write the steps for a 5-mark answer.
- 2 List important diagrams/tables/procedures.
- 3 Prepare one long-answer outline.
- 4 Write last-minute revision checklist.

# One-page Quick Revision

Last-minute checklist for Computer Aided Design and Manufacturing.

## Important Points

- Definitions and key terms.
- Diagrams, formulas, procedures or formats.
- Applications in Mechanical Engineering.

## Exam Method

- OK** Read question carefully.
- OK** Write answer in steps.
- OK** Label diagrams and units.
- OK** Finish with result/application.

## Common Mistakes

- NO** Skipping units or labels.
- NO** Writing answer without structure.
- NO** Mixing definitions and applications.
- NO** Leaving diagrams untidy.

# Answers and Hints

Answer hints exactly match the expected questions inside modules.

## Module 1 Answer Hints

### M1-Q1

Use textbook answer format: definition, diagram/block/circuit if needed, working principle, key points, applications and conclusion related to Computer Aided Design and Manufacturing.

### M1-Q2

Use textbook answer format: definition, diagram/block/circuit if needed, working principle, key points, applications and conclusion related to Computer Aided Design and Manufacturing.

### M1-Q3

Use textbook answer format: definition, diagram/block/circuit if needed, working principle, key points, applications and conclusion related to Computer Aided Design and Manufacturing.

### M1-Q4

Use textbook answer format: definition, diagram/block/circuit if needed, working principle, key points, applications and conclusion related to Computer Aided Design and Manufacturing.

## Module 2 Answer Hints

### M2-Q1

Use textbook answer format: definition, diagram/block/circuit if needed, working principle, key points, applications and conclusion related to Computer Aided Design and Manufacturing.

### M2-Q2

Use textbook answer format: definition, diagram/block/circuit if needed, working principle, key points, applications and conclusion related to Computer Aided Design and Manufacturing.

### M2-Q3

Use textbook answer format: definition, diagram/block/circuit if needed, working principle, key points, applications and conclusion related to Computer Aided Design and Manufacturing.

### M2-Q4

Use textbook answer format: definition, diagram/block/circuit if needed, working principle, key points, applications and conclusion related to Computer Aided Design and Manufacturing.

## Module 3 Answer Hints

### M3-Q1

Use textbook answer format: definition, diagram/block/circuit if needed, working principle, key points, applications and conclusion related to Computer Aided Design and Manufacturing.

### M3-Q2

Use textbook answer format: definition, diagram/block/circuit if needed, working principle, key points, applications and conclusion related to Computer Aided Design and Manufacturing.

### M3-Q3

Use textbook answer format: definition, diagram/block/circuit if needed, working principle, key points, applications and conclusion related to Computer Aided Design and Manufacturing.

### M3-Q4

Use textbook answer format: definition, diagram/block/circuit if needed, working principle, key points, applications and conclusion related to Computer Aided Design and Manufacturing.

## Module 4 Answer Hints

### M4-Q1

Use textbook answer format: definition, diagram/block/circuit if needed, working principle, key points, applications and conclusion related to Computer Aided Design and Manufacturing.

### M4-Q2

Use textbook answer format: definition, diagram/block/circuit if needed, working principle, key points, applications and conclusion related to Computer Aided Design and Manufacturing.

### M4-Q3

Use textbook answer format: definition, diagram/block/circuit if needed, working principle, key points, applications and conclusion related to Computer Aided Design and Manufacturing.

### M4-Q4

Use textbook answer format: definition, diagram/block/circuit if needed, working principle, key points, applications and conclusion related to Computer Aided Design and Manufacturing.
